

SUSTAINABLE DEVELOPMENT GOALS UKRAINE • 2019

MONITORING REPORT

This report uses a wide range of informational and statistical materials to highlight the progress made to achieve SDGs in Ukraine. The report was prepared by the Ministry of Economic Development, Trade and Agriculture of Ukraine and State Statistics Service of Ukraine with support of the UNICEF in Ukraine. The data presented in this report were sourced from the State Statistics Service in Ukraine and the respective line ministries.

Note. The report contains data for 2015-2018. Data exclude the temporarily occupied territory of the Autonomous Republic of Crimea, the city of Sevastopol and part of the temporarily occupied territories in Donetsk and Luhansk regions.

This publication was prepared and/or printed/published with support of the United Nations Children’s Fund (UNICEF) office in Ukraine. The statements in this publication are the views of the author(s) and do not necessarily reflect the policies or the views of UNICEF.

INTRODUCTION

In September 2015 the 70th session of the UN General Assembly in New York hosted the UN Sustainable Development Summit, which approved new development targets. The final document from the summit, “Transforming our world: a 2030 agenda for sustainable development”, identified 17 Sustainable Development Goals and 169 supporting targets.

Like other UN Member States, Ukraine joined the global process of sustainable development. A participatory and inclusive process to adapt the SDGs to the Ukrainian context was launched. The national strategic framework up to 2030 based on the principle of “leave no one behind” was established. The Economic Development, Trade and Agriculture of Ukraine is the executive secretariat of the Interagency Working Group on the Coordination of Implementation and Monitoring of the SDGs in Ukraine.

The Ministry of Economic Development, Trade and Agriculture of Ukraine and the State Statistics Service of Ukraine have started the monitoring process by developing the first Monitoring Report on national SDG indicators. According to the

Order of the Prime Minister of Ukraine №33598/1/1-19 dated 03.12.2019 on the implementation of the Presidential Decree №722/2019 dated 30.09.2019 ‘On the Sustainable Development Goals of Ukraine for the period up to 2030’ the Ministry of Economic Development, Trade and Agriculture of Ukraine is responsible for the SDGs implementation and monitoring in Ukraine, including the preparation of a Voluntary National Review on Ukraine’s progress towards the SDGs to be presented in 2020.

The practical implementation of SDGs targets requires the adequate information and analytical support, the application of a comprehensive approach, the use of various sources of data, both state statistics and administrative data. For the purpose of monitoring the achievement of the SDGs a system of national SDGs indicators is established. Priority was given to data that have been collected on an ongoing basis within the official statistical system in accordance with established standards and methodologies, and administrative reporting of ministries, other central and local executive authorities, institutions, organizations.

The SDGs targets will serve as key reference points for drafting upcoming strategic planning/policy documents from the perspective of securing the human rights.

Main steps for integrating SDGs into the framework of the national policy and priorities of the Government of Ukraine:

- 2016- 2017 – an open process of adaptation and localization of SDGs aimed to identify the national priorities and development targets up to 2030; approval of the baseline National Report “Sustainable Development Goals: Ukraine” (September 2017);
- 2018 – incorporation of the identified goals and targets into state strategic documents; establishing SDGs monitoring system;
- 2019 – drafting three SDGs monitoring reports, analysis on status of incorporation SDGs into programmatic documents (the first thematic National Report ‘SDGs for Children in Ukraine’ which was presented by the Minister of Social Policy of Ukraine at High Level Political Forum, July 2019; the National Report ‘SDGs in Ukraine. SDG8 Decent Work and Economic Growth’ with focus

on youth which was presented by the Government of Ukraine at High Level Political Forum, July 2019; ‘2019 Progress Report: SDGs in Ukraine’ (monitoring of the SDGs indicators for 2015-2018) which was presented by the President of Ukraine at the UN SDGs Summit, New York, 25 September 2019).

Currently a large number of strategic and policy documents (more than 145) are in line with SDGs. The main systemic problem in the field of strategic planning lies in the fact of incomplete transformation processes in the country and lack of strategic vision of the national economic and social development vector. There is a clearly the lack of a comprehensive system for reform planning, step-by-step realization of reforms as well as mechanisms to evaluate their consequences for society (first of all the most vulnerable), and public monitoring.

Having analyzed the SDGs related strategic and policy documents the following can be pointed out:

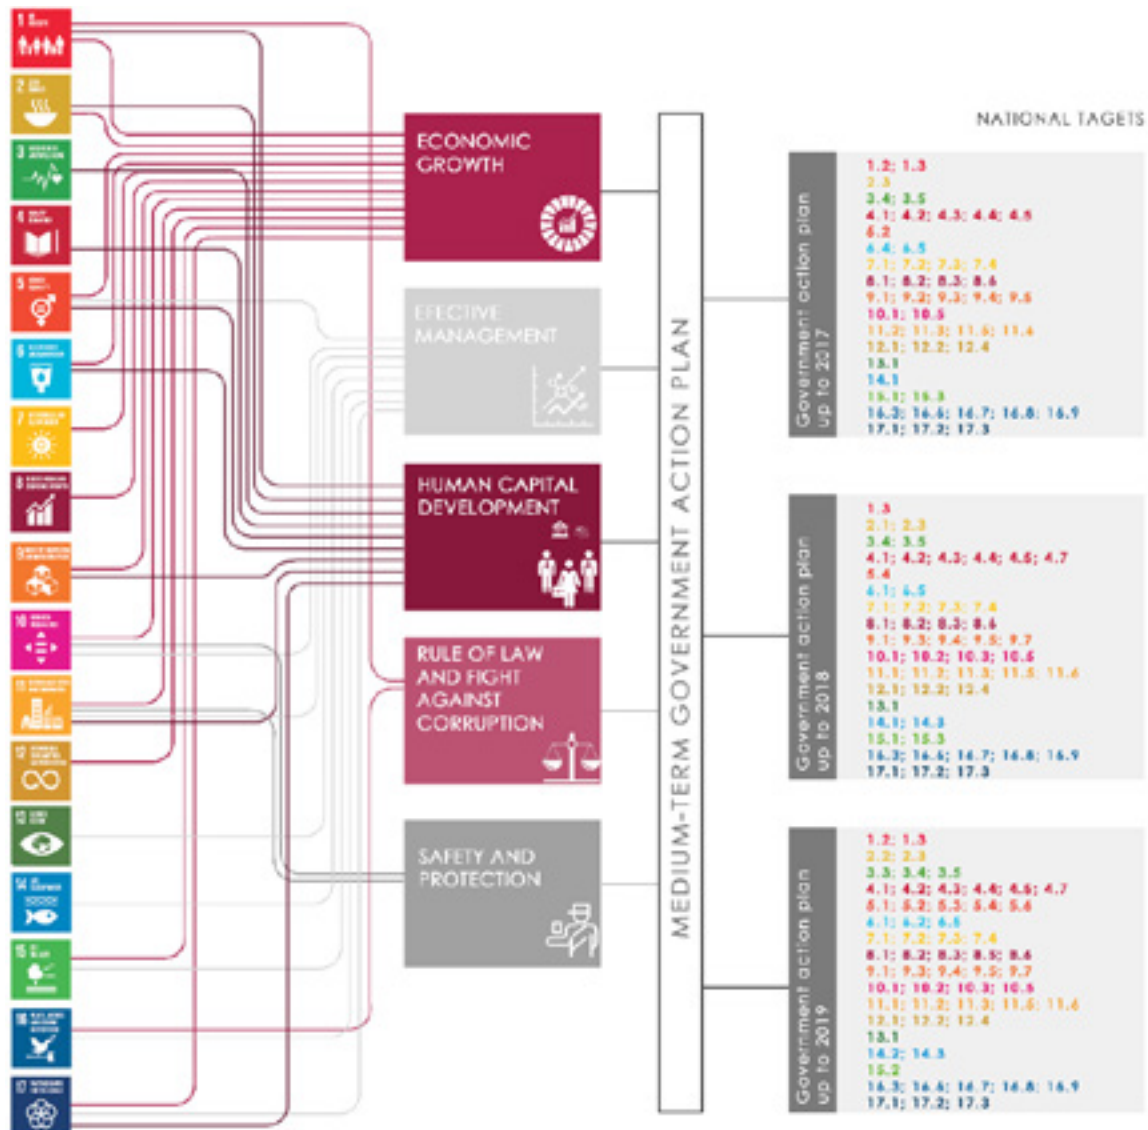

- lack of long-term vision of development and reform implementation plans linked with SDGs (outlining top-priority reforms

Fig. 1. Status of SDG incorporation into the current regulatory acts (national strategic and policy documents)

- and evaluating necessary resources for their realization);
- no continuity of strategic documents both in the timing and content aspects;
 - abundance of priorities (present in strategic documents);
 - gap between the tasks specified as having top priority, concrete operational measures to perform them, and financial provision;
 - lack of tradition to step-by-step implement priority tasks identified by SDG based strategic documents, the tasks being substituted for by “crisis management”, i.e. by addressing current urgent problems.

Fig. 2. Integration SDGs into Government medium-terms and annual plans

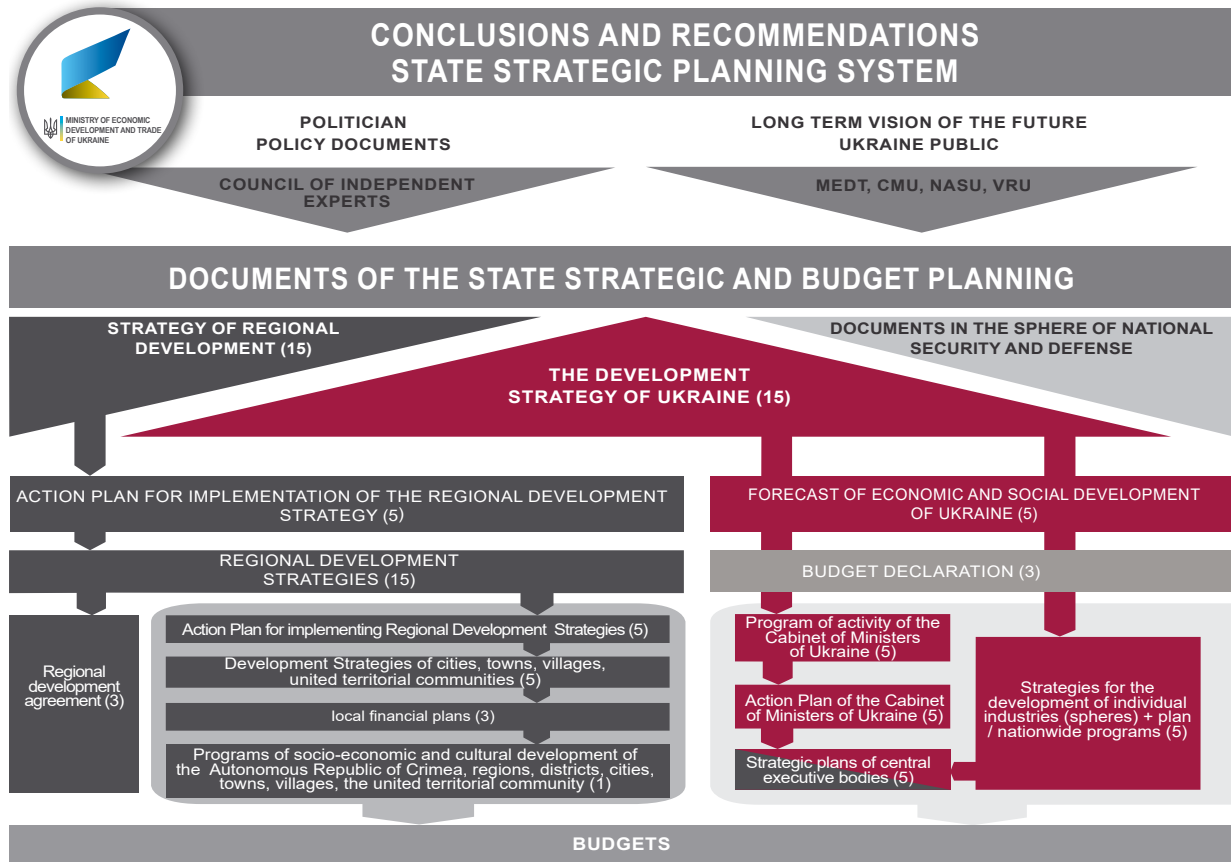

The outcome of such non-systemic SDGs based strategic planning activity is, among others, the underfunding of important objectives, the low degree of SDGs incorporation into development agenda, the overlapping of functions, objectives and activities among national authorities, the low level of accountability for results. In order to overcome the shortcomings at the state level it is expedient to introduce

systemic changes, namely, to fully revise the system of definition, planning, monitoring and implementation of the country's development goals.

The draft Law of Ukraine On State Strategic Planning, developed by the Ministry of Economic Development, Trade and Agriculture of Ukraine together with other interested central executive bodies, is based

Fig. 3. Strategic planning and SDGs

on the fundamentally new principles of forming a system of state strategic planning and forecasting instruments that envisage significant changes in the system and structure of such documents, their hierarchy, the composition of entities responsible for the development and approval, monitoring and evaluation of efficiency, as well as public reporting on the implementation of objectives and activities. The Draft Law also envisages that all documents of the new system should be interlinked and linked to budgeting, which will reduce the dispersion of the budget funds and allow to concentrate them on achievement of the identified goals, above all things SDGs.

To achieve the SDGs, the decision-making processes of senior management should be improved through the analysis of relevant statistical information. The monitoring of progress against SDG targets requires appropriate information and analytical support using an integrated approach and different data sources. In-depth research, identification of the risks and factors that

affect the welfare of the population, and the study of threats to macroeconomic, social and environmental sustainability are required to adjust management decisions that are necessary to develop appropriate measures to achieve the goals. An integrated approach to the study of progress against the SDGs indicators envisages applying various types of information that will determine the scope and direction of changes and identify the most important direct and hidden factors for later use in the process of developing an appropriate public policy.

The global indicator framework was developed by the Inter-Agency and Expert Group on SDG Indicators (IAEG-SDGs) and agreed upon, including refinements on several indicators, at the 48th session of the United Nations Statistical Commission held in March 2017. The global indicator framework was later adopted by the General Assembly on 6 July 2017 and is contained in the Resolution adopted by the General Assembly on Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development

(A/RES/71/313), Annex. The official indicator list below includes the global indicator framework as contained in A/RES/71/313 including refinements agreed by the Statistical Commission at its 49th session in March 2018 (E/CN.3/2018/2, Annex II) and at its 50th session in March 2019 (E/CN.3/2019/2, Annex II). The list includes 232 indicators on which general agreement has been reached. Special attention was paid to the Official Statistics Development Programme, the International Comparison Programme and the use of big data for official statistics; improvement of national accounts statistics; environmental-economic accounting and climate change; the development and implementation of international statistical classifications, industrial statistics, measurement information and ICT; statistics on refugees and IDPs; and statistics on public administration.

Based on the results of the relevant sessions of the UN Statistical Commission, there are 232 global indicators for the SDGs. All figures may be distinguished as follows according to the level of their methodological processes and the availability of data in Ukraine:

- conceptually clear indicators for which there are standards and common methodology; most countries, including Ukraine, regularly publish data;
- conceptually clear indicators for which there are standards and common methodology, but countries including Ukraine publish data irregularly; and
- indicators for which there are either no common standards and methodologies or which are under development/testing.

The global indicators are designed to analyse trends of progress against the SDGs at the global level and for international comparison. However, these figures are not always appropriate in the national context. The indicators are designed to monitor the national and subnational (local) level and have to be developed based on the capacities of the national statistical system. A review of the information available in Ukraine to monitor the global SDG indicators shows that the current government statistics agencies collect information on 96 indicators. In fact, 52 indicators comply fully with existing international standards, while 44 indicators are

in incomplete (partial) compliance with existing international standards. It should be noted that 35 global indicators are not quantifiable and can usually be estimated by international organizations. The remaining parameters are uncertain (further consultations with government authorities are needed to assess their availability) or require methodological explanations from the interagency panel.

The challenges that may complicate the monitoring of progress against the SDGs: in Ukraine there is a lack of methodology and techniques for calculating a number of indicators; a lack of analysis of national indicators' compliance with international standards; a lack of regulation that defines the Chief Executives Board for Coordination (CEB), which is responsible for monitoring the development agenda at both the international and national level and for providing information; and a lack of a national information base that defines the necessity of introducing special tests.

Setting the SDGs targets for Ukraine and indicators to monitor progress requires a significant expansion of the existing information sector. It appears that a more efficient method would be to introduce special (sociological) sample studies that should be performed by non-specialized institutions with adequate authority and a good reputation. It would be sufficient to conduct such research once every five years, according to the terms of achieving the control target values of the SDG indicators: base (2015), 2020, 2025 and 2030. The surveys should provide the highest possible level of disaggregation of data (urban/rural, gender, level of education – primary or basic secondary, complete secondary, vocational, higher – the number of minor children, household size, and age – under 20 years, 20–29, 30–39, 40–49, 50–59, 60–69, 70 years and older) and be representative across Ukraine as a whole. As more detailed disaggregation is needed in most cases, it would be more efficient to conduct two comprehensive studies: one on the environment and a second on four key areas of action: equitable social development, sustainable economic growth, environmental protection, and efficient and transparent governance.

Goal 1. End poverty

Target 1.1.

Reduce poverty by 4 times, including by eliminating extreme poverty

- 1.1.1.** Share of the population whose average per capita equivalent total expenditure is lower than the actual¹ (estimated) subsistence minimum, %

Target value set for 2020 – 30.0

	2015	2016	2017	2018
Share of the population whose average per capita equivalent total expenditure is lower than the actual ¹ (estimated) subsistence minimum, %	58.3	58.6	47.3	43.2

Source: IDSS NAS

- 1.1.2.** Share of individuals whose daily consumption is below USD5.05 PPP, %

Target value set for 2020 – 0.5

	2015	2016	2017	2018
Share of individuals whose daily consumption is below USD5.05 PPP, %	2.4	2.0	1.9	1.8

Source: IDSS NAS

Target 1.2.

Increase the coverage of poor people with targeted social assistance programmes

- 1.2.1.** Share of the poor population covered by state social support in the total number of poor people, %

Target value for 2020 will be additionally provided

	2015	2016	2017	2018
Share of the poor population covered by state social support in the total number of poor people, %	63.0	70.3	73.6	70.9

* The indicator was introduced in the process of revising SDGs indicators and drafting the Order of the Cabinet of Ministers of Ukraine 'Data Collection Issues for the Monitoring of Sustainable Development Goals' dated 21 August 2019 № 686-p. Currently the target values for the newly developed indicators are determined by central executive authorities and included in an updated version of the National Report 'Sustainable Development Goals: Ukraine' to be published by the Ministry of Economic Development, Trade and Agriculture of Ukraine.

crop products	95.4	104.1	98.9	104.3
livestock products	96.3	97.8	99.7	98.4

Source: SSSU

Target 2.3.

Ensure the development of sustainable food production systems that help maintain ecosystems and gradually improve the quality of land and soil, primarily through innovative technologies

2.3.1. The index of food production, %

Target value set for 2020 – 103.0

	2015	2016	2017	2018
Index of food production, % compared to the previous year	87.2	106.0	104.2	98.5
Production of meat and meat products	99.8	104.5	101.3	99.1
Processing and preserving of fish, crustaceans and molluscs	71.4	115.6	106.8	112.4
Processing and preserving of fruits and vegetables	74.6	100.2	105.1	110.4
Production of oil and animal fats	85.8	116.5	118.7	94.5
Production of dairy products	91.2	98.6	102.1	100.4
Production of flour and cereal products, starches and starch products	94.6	100.7	99.4	92.5
Production of flour and cereal products	95.2	99.5	96.2	92.8
Production of bread, bakery and flour products	86.9	97.7	96.9	95.3
Production of bread and bakery products; production of short-term storage flour confectionery, cakes and pastries	91.1	96.2	91.3	93.4
Production of rusks and biscuits; production of long-term storage flour confectionery, cakes and pastries	79.9	100.5	105.0	99.3
Production of other food products	79.0	111.5	102.2	98.8
Production of sugar	69.5	136.2	99.2	89.4
Production of cocoa, chocolate and sugar confectionery	82.9	98.6	106.4	109.6
Production of tea and coffee	92.0	103.7	93.7	107.3
Production of spices and seasonings	86.4	100.4	104.8	100.4
Production of other food products not elsewhere classified	75.8	88.1	103.4	106.9

Source: SSSU

2.3.2. Share of food industry and agricultural raw materials processing production in exports of Ukrainian Classifier of Goods for Foreign Economic Activity groups 1–24, %

Target value set for 2020 – 51.0

	2015	2016	2017	2018
Share of food industry and agricultural raw materials processing production in exports of Ukrainian Classifier of Goods for Foreign Economic Activity groups 1–24, %	38.3	42.0	41.0	39.4

Target 4.2.

Ensure access to quality pre–primary development for all children

4.2.1. Coverage of children aged 5 years by pre-school education institutions and structural units of public and private legal entities, %

Target value set for 2020 – 80.0

	2015	2016	2017	2018 ¹
Ukraine	70.6	69.8	69.5	69.2
by place of residence				
urban	77.4	76.8	76.4	76.7
rural	57.4	56.0	56.1	54.7

Source: SSSU

¹ The calculation uses data on the number of permanent population of Ukraine as of 01.01.2018.

Target 4.3.

Ensure access to vocational education

4.3.1. Ratio of the number of entrants to vocational technical establishments to the total number of places in vocational technical establishments funded from the state and local budgets

Target value for 2020* will be additionally provided

	2015	2016	2017	2018
Ratio of the number of entrants to vocational technical establishments to the total number of places in vocational technical establishments funded from the state and local budgets	84	93	76	85

Source: MES

Target 4.4.

Improve the quality of tertiary education and ensure its close relationship with science, and promote the establishment of towns of education and science in the country

4.4.1. Number of Ukrainian cities – members of the UNESCO Global Network of Learning Cities

Target value for 2020* will be additionally provided

	2015	2016	2017	2018
Number of Ukrainian cities – members of the UNESCO Global Network of Learning Cities	–	1	4	4

Source: MES

4.4.2. Population by the level of education and gender, %

Source: SSSU – August after the reporting year, from 2020

4.4.3. Cost of training a specialist

Target value for 2020* will be additionally provided

	2015	2016	2017	2018
Cost of training a specialist¹				
average cost per student, UAH	27,548.2	29,141.6	32,820.2	39,882.7
average cost per graduate student trained on-the-job, UAH	15,349.8	16,410.3	17,798.5	30,449.1
average cost per full-time graduate student, UAH	36,040.1	38,905.5	48,216.0	70,308.8
average cost per doctoral student, UAH	49,349.0	57,783.6	67,968.0	118,473.2 ²

Source: MES

¹ The actual data on the training of students in higher education institutions subordinate to the Ministry of Education and Science under the general fund (source: reports of the Ministry of Education and Science on the implementation of the budget program passport 2201160).

² Data for 2018 refer to students of higher education institutions of III and IV levels of accreditation.

4.4.4. Expenditures of higher education institutions on scientific research activities

Target value for 2020* will be additionally provided

	2015	2016	2017	2018
Expenditures of higher education institutions on scientific research activities, million UAH	345.1	381.8	430.3	467.4

Source: MES

Target 4.5.

Increase the prevalence of knowledge and skills required for decent jobs and entrepreneurship among the population

4.5.1. Level of participation of the population in formal and informal forms of education and vocational training, %

Target value set for 2020 – 10.0

	2015	2016	2017	2018
Level of participation of the population in formal and informal forms of education and vocational training, %	9.2	9.0	8.7	8.6
by age groups				
15-24 years	55.9	56.5	57.6	59.4

7.1.2. Electric power distribution losses, %

Target value set for 2020 – 11.00

Year	Supply of electricity to the grid	Productive supply of electricity to the grid	Reported actual value of technological electric power consumption		Including				Technological electric power consumption in distribution system	
			million kWh	%	normative value of technological electric power consumption	%	excess value of technological electric power consumption	%	value of technological electric power consumption	%
2015	146,642	131,861	16,860	11.5	19,034	13.0	-2,174	-1.5	16,860	11.50
2016	141,619	131,274	16,626	11.7	18,805	13.3	-2,179	-1.5	16,626	11.74
2017	142,509	132,093	16,774	11.8	18,820	13.2	-2,046	-1.4	16,774	11.77
2018	143,792	129,191	16,996	11.8	19,140	13.3	-2,144	-1.5	16,996	11.82

Source: MECI

7.1.3. Heat losses in heat networks, %

Source: MRDCHCS – November after the reporting year, from 2020

Target 7.2.

Ensure diversification of the supply of primary energy resources

7.2.1. Maximum share of imported primary energy (excluding nuclear fuel) from one country (company) in the total supply (imports), %

Target value set for 2020 – <15

	2015	2016	2017	2018
Maximum share of imported primary energy:				
coal (2701)	54.3	66.7	67.0	70.2
petroleum (2709)	99.9	97.4	85.2	94.2
natural gas (271121)	37.3	29.5	40.5	37.3

Source: SSSU

7.2.2. Share of one supplier of the nuclear fuel market, %

Target value set for 2020 – <70

	2015	2016	2017	2018
Share of one supplier of the nuclear fuel market, %	91.6	60.9	58.6	61.4

Source: SSSU

Target 7.3.

Increase the share of renewable energy in the national energy balance, in particular through the introduction of additional capacities at facilities that produce energy from renewable sources

7.3.1. Share of energy produced from renewable sources in total final energy consumption, %

Target value set for 2020 – 11.0

	2015	2016	2017	2018 ¹
Share of energy produced from renewable sources in total final energy consumption, %	4.9	5.8	6.7	–

Source: SAEES

¹ Calculation of the indicator for 2018 will be provided after the SSSU publishes the Energy Balance of Ukraine for 2018 and information on the volumes of production, import, export, stocks and use of fuel and energy in the format of 5 international IEA/Eurostat/UNECE questionnaires (December 2019).

Target 7.4.

Increase the energy efficiency of the economy

7.4.1. Energy intensity of GDP (primary energy consumption per unit of GDP), kg of oil equivalent per USD1 by PPP 2011

Target value set for 2020 – 0.200

	2015	2016	2017 ¹	2018 ²
Energy intensity of GDP (primary energy consumption per unit of GDP), kg of oil equivalent per USD1 by PPP 2011	0.282	0.288	0.267	–

Source: SSSU

¹ Operational data.

² The data will be calculated on the basis of the 2018 Energy Balance of Ukraine data, which will be published on the official website of SSSU in accordance with the State Statistical Observations Plan for 2019 on December 26, 2019.

Goal 8. Decent work and economic growth

Target 8.1.

Ensure a steady GDP growth by modernizing production, developing innovation, increasing export potential and exporting products with high value added

8.1.1. GDP volume index, %

Target value set for 2020 – 104.0

	2015	2016	2017	2018 ¹
GDP volume index, %	90.2	102.4	102.5	103.3

Source: SSSU

¹ For 2018, the data are preliminary. The final data – 28.12.2019.

8.1.2. Share of gross fixed capital to GDP, %

Target value set for 2020 – 23.0

	2015	2016	2017	2018 ¹
Share of gross fixed capital to GDP, %	13.5	15.5	15.8	17.2

Source: SSSU

¹ For 2018, the data are preliminary. The final data – 28.12.2019.

8.1.3. Share of exports of goods whose production uses technologies of high and medium high level in total exports of goods, % (groups "Products of chemical and related industries", «Polymers, plastics and articles thereof», «Machinery, equipment and mechanisms, electrical equipment», "Ground transportation, aircraft, floating craft", 90th subgroup of the group «Optical and photographic devices and appliances» (UCGFEA))

Target value set for 2020 – 25.0

	2015	2016	2017	2018
Share of exports of goods whose production uses technologies of high and medium high level in total exports of goods, % (groups «Products of chemical and related industries», «Polymers, plastics and articles thereof», «Machinery, equipment and mechanisms, electrical equipment», «Ground transportation, aircraft, floating craft», 90th subgroup of the group «Optical and photographic devices and appliances» (UCGFEA))	19.2	17.3	16.8	17.0

Target 16.7.

Increase the efficiency of government bodies and local self-government

16.7.1. Ukraine's ranking in the Global Competitiveness Report by sub-index 'Institutions (government and public institutions)'

Target value for 2020* will be additionally provided

	2015	2016	2017	2018 ¹
Ukraine's ranking in the Global Competitiveness Report by sub-index 'Institutions (government and public institutions)'	130	129	118	110

Source: MEDT

¹ When compiling the GCR 2018, a new methodology was applied in order to expand the scope of processes in the global economy: a sub-index score was calculated based on a 100-point scale (100 points – ideal state or “threshold” of competitiveness). In previous reports, the score was based on a 7-point scale. Most of the subindices have been reformatted. Therefore, it is incorrect to compare the country's ranking in the GCR 2017 and GCR 2018 with previous rankings determined using the old methodology. Ukraine's ranking by sub-indices in GCR 2017 was not recalculated according to the new methodology.

Target 16.8.

Recovery of conflict affected areas in eastern Ukraine

16.8.1. Share of the population satisfied with their experience of the use of infrastructure and the level of social services in key areas in Donetsk and Luhansk oblasts, %

Source: MTOTIDP – October after the reporting year, from 2020

16.8.2. Share of the population satisfied with the level of administrative governance services in Donetsk and Luhansk oblasts, %

Source: MTOTIDP – October after the reporting year, from 2020

16.8.3. Number of communities in the Donetsk and Luhansk oblasts that implemented mine action, units

Target value for 2020* will be additionally provided

	2015	2016	2017	2018
Number of communities in the Donetsk and Luhansk oblasts that implemented mine action, units	–	121	167	112
