

Ukraine: Investor Presentation

MINISTRY OF **FINANCE OF** UKRAINE

February 2021

IMPORTANT: You must read the following before continuing. In accessing this document ("Information"), you agree to be bound by the following terms and conditions.

The Information is not an offer or invitation to, or solicitation of, any such distribution, placement, sale, purchase or other transfer of any securities in the territory of Ukraine.

The Information does not constitute or form part of, and should not be construed as an offer or the solicitation of an offer to subscribe for or purchase any securities, and nothing contained therein shall form the basis of or be relied on in connection with any contract or commitment whatsoever, nor does it constitute a recommendation regarding any securities.

The Information contains forward-looking statements. All statements other than statements of historical fact included in the Information are forward-looking statements. Forward-looking statements give Ukraine's current expectations and projections relating to its financial condition, results of operations, plans, objectives, future performance and business. These statements may include, without limitation, any statements preceded by, followed by or including words such as "target," "believe," "expect," "aim," "intend," "may," "anticipate," "plan," "project," "will," "can have," "likely," "should," "could" and other words and terms of similar meaning or the negative thereof. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors beyond control of the Ministry of Finance of Ukraine that could cause actual results, performance or achievements to be materially different from the expected results, performance or achievements expressed or implied by such forward-looking statements are based on numerous assumptions regarding Ukraine's present and future strategies and the environment in which it will operate in the future.

No representation, warranty or undertaking, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the Information or the opinions contained therein. The Information, including but not limited to forward-looking statements, applies only as of the date of this document and is not intended to give any assurances as to future results. The Ministry of Finance expressly disclaims any obligation or undertaking to disseminate any updates or revisions to the Information, including any fiscal data or forward-looking statements, and will not publicly release any revisions it may make to the Information that may result from any change in expectations, any change in events, conditions or circumstances on which these forward-looking statements are based, or other events or circumstances arising after the date of this document.

reform of scientific setup

Solid foundation for long-term economic growth

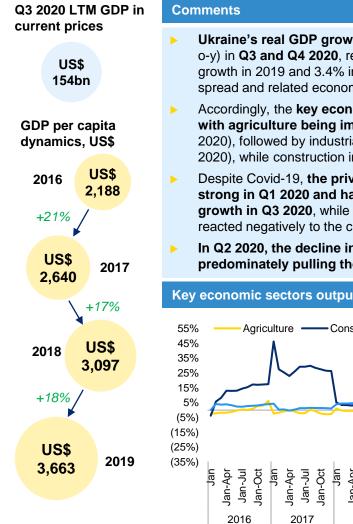

2 Return to gradual fiscal consolidation

3 Prudent debt management strategy

Reviving business climate and development prospects

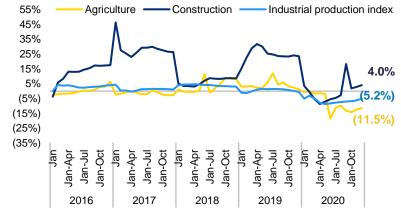

5 Strong focus on ESG considerations

Accumulated economic buffer to curb Covid-19 crisis (1/2)

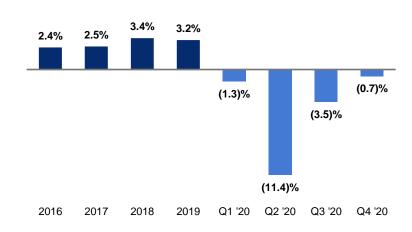

- Ukraine's real GDP growth declined by 3.5% and 0.7% (yo-y) in Q3 and Q4 2020, respectively (compared to 3.2% growth in 2019 and 3.4% in 2018), on the back of Covid-19 spread and related economic disruptions
- Accordingly, the key economic sector outputs contracted with agriculture being impacted the most (-11.5% y-o-y in 2020), followed by industrial production (-5.2% y-o-y in 2020), while construction increased by 4.0% y-o-y in 2020
- Despite Covid-19, the private consumption remained strong in Q1 2020 and have guickly returned to slight growth in Q3 2020, while the fixed capital accumulation reacted negatively to the crisis almost immediately
- In Q2 2020, the decline in private consumption was predominately pulling the real GDP change down

Key economic sectors output growth $(y-o-y)^1$, %

Notes

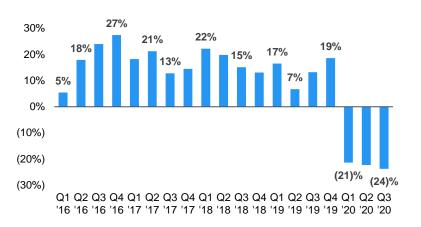

1 To the corresponding period of the previous year on a cumulative basis

Accumulated economic buffer to curb Covid-19 crisis (2/2)

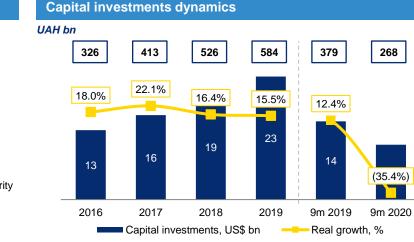

Comments

- Although industrial output contracted in 2020, some sectors managed to keep the stable or upward dynamics, incl. production of chemicals (+4.7%), and pharma products (+3.0%)
- Gross fixed capital went down by 23.8% in Q3 2020 on the back of the economic disruption caused by Covid-19
- Despite 35.4% capital investments decline in 9m 2020, the consistent growth in the previous periods (15%+ y-o-y in 2016-2019) is expected to solidify Ukraine's prospects for quick economic recovery post Covid-19 outbreak
 - Industry has been the major contributor to capital investments in 9m 2020 accounting for c.38% followed by construction and agriculture with 10% and 9%, respectively

Despite economic downturn, consumer demand remains firm

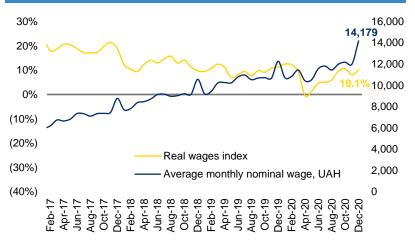

Comments

- Over recent years, consumer demand was consistently driven by a number of factors, including steady rise in real wages, improving consumer sentiments (before Q1 2020), growing personal money remittances
 - Despite economic crisis caused by Covid-19, real wages growth was mainly resilient and reached 10.1% y-o-y in Dec 2020
- Covid-19 also had limited impact on the retail trade: its turnover growth increased to 8.4% in Jan-Dec 2020 from just above 3% as of Apr-Jun 2020
- Final private consumption returned to upward trend and grew by 1.0% y-o-y in Q3 2020 after a 10.4% y-o-y decline in Q2 2020

Marked impact of Covid-19 on external trade in 2020

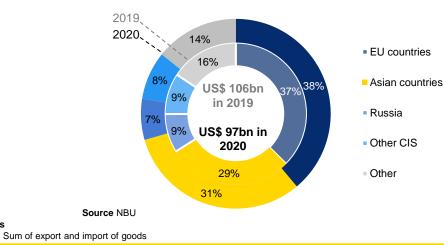

Comments

- Based on preliminary estimates, global Covid-19 pandemic and subsequent lockdown had a pronounced impact on Ukraine's external trade in 2020 with export of goods falling relatively slightly by 1.7% while import of goods declining more rapidly by 11.0% y-o-y in 2020
 - The total export and import of goods have reached US\$ 49.2bn and US\$ 54.1bn in 2020, respectively
- With increased net exports in 2020 such foreign trade dynamics had a positive impact on Ukraine's current account

Y-o-y change in Export export, % 0% (12%) 19% 1% (1%) 40% (36%) (20%) 2020 22.1 22.2 2019 10.3 9.0 4.0 4.8 4.5 4.5 4.6 3.6 2.7 1.8 1.8 1.9 0.9 0.6 Food and Ferr. & Mineral Machinery Timber and Chemicals Fuel & Other agri non-ferr. products and equip. wood energy metals ^{1.3} 1.4 0.8 0.6 3.7 3.1 5.7 6.5 7.5 7.8 10.7 11.5 12.2 12.4 13.3 16.3 13% (13%) 8% 44% (36%) (24%) (14%) (20%) Y-o-y change in Import import, %

1

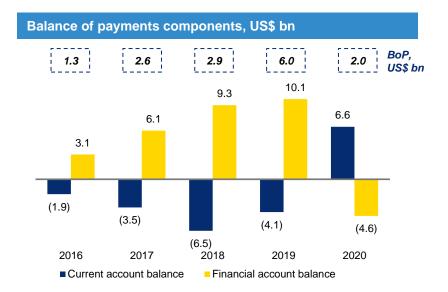

Notes

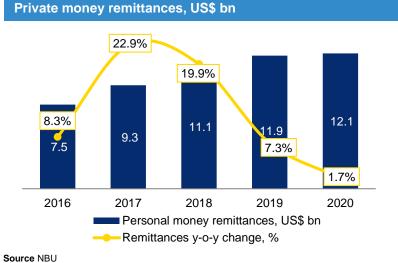

Export and import of goods dynamics, US\$bn

Firm external position leading to less vulnerability to external shocks

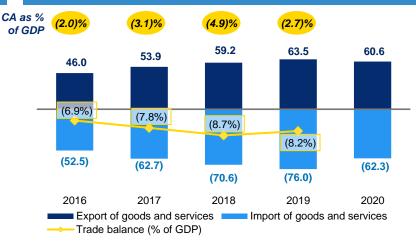

Comments

- The trade balance deficit amounted to US\$ 1.7bn in 2020 due to decreased import coupled with only slightly reduced export (vs US\$ 12.5bn deficit in 2019 largely supported by large machinery and equipment, chemicals, food and agri imports)
- The current account (CA) balance demonstrated surplus in 2020, resulting from a relatively stable goods export and a decrease in imports due to global energy prices decline
- Improved trade balance was partially offset by capital account outflows which resulted into positive balance of payments of c.US\$ 2.0bn in 2020

Ukraine's current and trade balance dynamics, US\$ bn

February 2021

Prudent monetary policy implemented by independent regulator

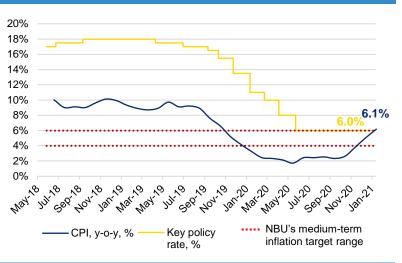

Comments

Medium-term consumer inflation target range: 5%+/-1%

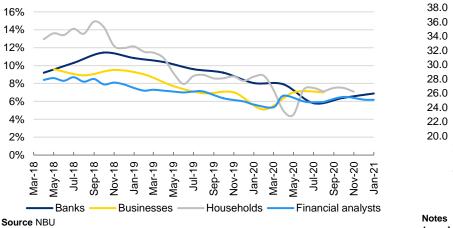

Y-o-y inflation as of January 2021: 6.1%

- The NBU has significantly softened its monetary policy maintaining the cycle of key policy rate cuts until June 2020 on the back of UAH appreciation and decelerated inflation
- Overall, the key policy rate was reduced by 7.5 p.p. since the beginning of 2020, reaching the historic low of 6% over Ukraine's independence on June 6, 2020
- During July 2020 February 2021, the NBU has decided to keep its key policy rate at 6% to curb the price growth as the economy recovers in 2021–2022, while leaving room for its further decrease
- Due to relatively tight monetary conditions and UAH revaluation, the NBU brought inflation to its medium-term target (5% +/-1%) in 2019 vs end-2020 planned initially

UAH/US\$ and UAH/EUR exchange rates dynamics

CPI expectations for the following 12 months

Accumulated international reserves

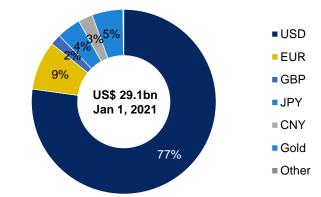

Comments

- Gross international reserves grew by 15% (y-o-y) and reached US\$ 29.1bn as of January 1, 2021 (covering 4.8 months of future imports)
- Maintained high levels of FX reserves and floating FX rate policy are the most influential factors providing strong buffer for Ukraine on the back of the current crisis (vs previous ones)
- Over December 2020, the international reserves increased on the back of NBU's net FX purchase (US\$ 289.2m), new FX domestic placements (US\$ 1.0bn), government transactions to repay public debt (US\$ 478.3m), and financial instruments revaluation gain (US\$ 217.5m)

Dec 31, 2020

Ukraine's domestic government bond holders

Key highlights

Source Ministry of Finance, NBU

On August 28, the NBU has eliminated obstacles for foreign investors to enter the Ukrainian securities market through establishment of the direct access to the purchase and sale of government bonds with the help of a "nominee holder"

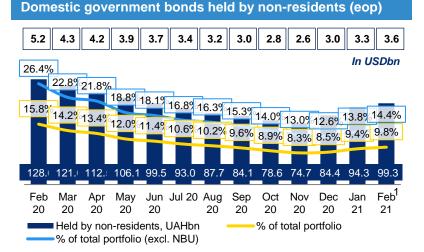

From now on

Ukrainian banks that have accounts with the NBU depository will be able to open depot accounts for its foreign clients for the purpose of buying and selling Ukrainian government bonds

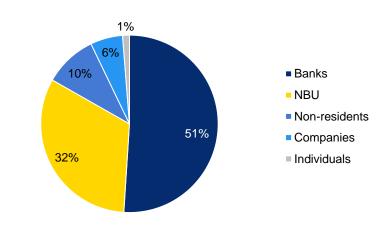

Notes

- As of February 11, 2021
- 2 According to NBU's survey about inflation expectations of financial analysts for the next 12 months

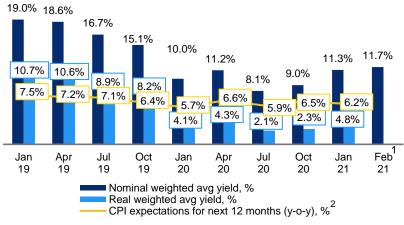

- With a c.51% share, banks are currently the largest holder of domestic government bonds followed by the NBU, which accounts for c.32% of the portfolio¹
- At c.9.8% of total outstanding Ukrainian domestic government bonds as of February 2021¹, the portfolio held by non-residents has recently returned on its upward trajectory (after Mar-Nov 2020 decline in line with the EM's capital outflow)
- Ukraine is making consistent steps to deepen domestic government bond market and to increase share of nonresidents in local currency bonds portfolio
 - A link between Clearstream, the international central securities depository, and the depository of the NBU active since May 2019 ensuring streamlined access to Ukraine's domestic government bond market

Pipeline of official concessional external financing

| Combined with a | Partner | Programs | Pipeline financing |
|---|--------------------------------|--|--------------------|
| proactive response to Covid-19 economic fallout, Ukraine managed to secure a range of concessional financing from its international partners to cover significant portion of external financing needs for 2020 | International Monetary Fund | On June 9, IMF Executive Board approved 18-month Stand-By Arrangement (SBA) for Ukraine, under which US\$ 2.1bn (SDR 1.5bn) was disbursed immediately The total amount of program is US\$ 5.0bn (SDR 3.6bn) that will be directed towards support of balance of payments and budget to help address the effects of Covid-19 while moving forward important structural reforms | US\$ 3.0bn¹ |
| | European Union | EUR 1.2bn MFA program for Ukraine was adopted within EUR 3.0bn support package to neighboring partners in May 2020, o/w EUR 623.5m has been provided on December 9, while the second tranche will depend on conditions that will be negotiated in due course Since 2014, the EU has approved EUR 5.0bn in MFA support for Ukraine, o/w EUR 3.3bn were disbursed during 2014-2018, EUR 1.1bn in 2020, and EUR 0.6bn are expected in 2021 In addition, various European institutions provide significant financial support for Ukraine, e.g. EUR 340m from the EIB within "Early Recovery Programme" | EUR 0.6bn |
| | World Bank | On June 26, the World Bank has approved US\$ 350m First Economic Recovery Development Policy Loan (DPL) for Ukraine to support economic recovery and mitigate Covid-19 effects On December 11, the institution has approved US\$ 300m loan to the state budget general fund within the Second Additional Financing for COVID-19 Response under the Social Safety Nets Modernization Project | US\$ 0.7bn |
| Notes 1 Translated from SDR to US\$ based on 1.4424 US\$ per 1 SDR IMF exchange | Total amount of envis | aged external financing from the official partners | c.US\$ 4.3bn |
| rate as of February 11, 2021 | | | |

Status of cooperation between Ukraine and the IMF

New 18-months US\$ 5.0bn SBA program

- On May 21, 2020, a Staff Level Agreement on a new 18-month SDR 3.6bn (c. US\$ 5.0bn) arrangement under the Stand-By Arrangement (SBA) was agreed and approved by the Executive Board on June 9. It replaced the Staff Level Agreement on a 3-year Extended Fund Facility (EFF) program which was achieved in December 2019 and the Executive Board approval that was made afterwards
- Current list of structural benchmarks:

| | Envisaged completion date |
|--|---------------------------|
| (1) Approved SOBs' NPL reduction plans | End-Jun 2020 |
| (2) Reviewed and enacted to fully reflect gas and non-gas costs heating tariffs, adopted simplified procedure for households to switch gas supplier | End-Aug 2020 |
| (3) New organizational structures and frameworks for the STS and SCS | End-Sep 2020 |
| (4) Enacted selected amendments to the Banking Law | End-Nov 2020 |
| (5) Enacted amendments to the DGF and other laws to improve bank liquidation mechanism and recovery of assets | End-Oct 2020 |
| (6) Enacted amendments to the Law on the High Council of Justice to enhance its selection process | End-Oct 2020 |
| (7) Strengthened corporate governance in SOEs, including a new corporate charter for Naftogaz | End-Sep 2020 |
| (8) The STS and SCS to operate nationally as two single legal entities | End-Dec 2020 |
| (9) Complete a compliance audit by the State Audit Service of Ukraine, in consultation with external/third party auditors, of COVID-related spending | End-Mar 2021 |
| | |

Key priorities under new IMF's 2020 SBA program:

- Mitigating the economic impact of the crisis, including by supporting households and businesses
- Ensuring continued central bank independence and a flexible exchange rate
- Safeguarding financial stability while recovering the costs from bank resolutions
- Moving forward with key governance and anti-corruption measures to preserve and deepen recent gains

Note 1 Past tranches translated at NBU XDR/US\$ exchange rate as of the date of their receipt, future tranches (SBA 2020 program) translated per the IMF's rate of 0.7238 SDR/USD as of June 23, 2020

Ministry of

Finance

B / Stable credit rating affirmed by both Fitch and S&P

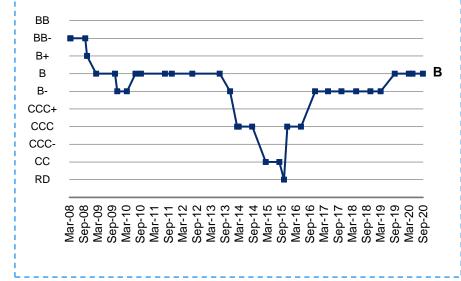

FitchRatings

Rating: B, Stable

Last update: Sep 4, 2020, reaffirmed at B, outlook Stable

Key rating drivers of the last review:

- Credible macroeconomic policy framework that had lowered inflation and narrowed fiscal deficits prior to the coronavirus shock
- Record of multilateral support, incl. IMF programme
- Increased international reserves, although still low external liquidity relative to high financing needs associated with large sovereign debt repayments
- Improved supervision and capitalization levels and NBU's liquidity support have reduced risks to financial stability

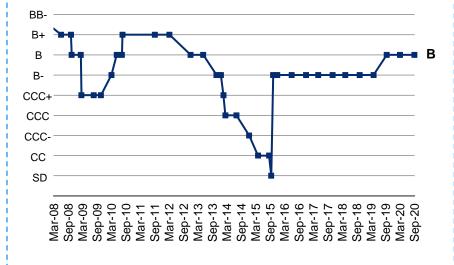

S&P Global

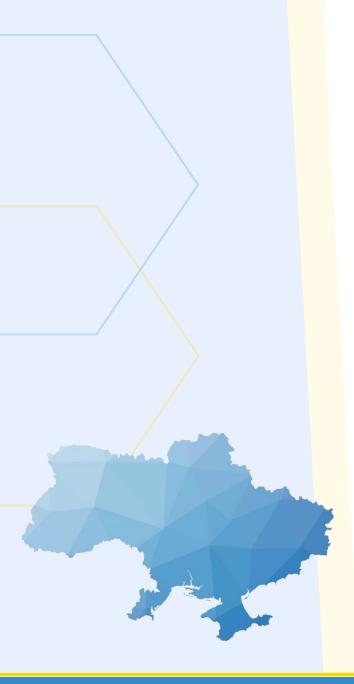

Rating: B, Stable

Last update: Sep 11, 2020, reaffirmed at B, outlook stable

Key rating drivers of the last review:

- FX reserves provide a cushion against potential adverse developments in the external financing environment
- Stronger macroeconomic management since 2015
- The ongoing implementation of reforms helps the government access commercial debt markets and receive concessional funding from IFIs
- Government external debt issuance, engagement with IFIs, and favorable current account dynamics have continued to support FX reserves through 2020
